

Research Associate in IT Systems

Three Research Associate positions are available for a 4 years period, starting immediately/when positions are filled, in order to work in a European Union funded research project.

Role:

The Research and Development (R&D) work will be conducted in the area of IT Systems and related technologies. More specifically, as an R&D funded project, the potential candidates will work closely together with the research staff at University of Nicosia Research Foundation.

Full rate (competitive salary) is offered.

Professional Qualifications

- (1) M.Sc. Degree in Computer Science, or in Software/Computer Engineering, or in a related discipline;
- (2) Excellent knowledge and basic experience in IT Systems;
- (3) Excellent programming skills and good knowledge/experience on IT Systems;
- (4) Excellent English writing and speaking skills.
- (5) Experience from any type of participation in national and international research projects with partners from academia and industry will be considered an advantage.

Candidates should be permanent residents in Cyprus for the duration of the project. Republic of Cyprus citizenship is not required.

A highly competitive salary and terms are offered. The duration and renewal of the contract will be based on the candidates' performance, activities and competitiveness.

Application Procedure:

Interested applicants please email and attach your full CV and all relevant academic certificates through our online recruitment system <http://vacancies.unic.ac.cy/> or via direct email to

Prof. Constandinos X. Mavromoustakis at mavromoustakis.c@unic.ac.cy

as soon as possible.

Positions will be closed once filled.

Only shortlisted candidates will be notified.
