

COMP 114 – Software Development Lab II  
Software Development Tools

Instructor: Dr. Gjermundrød

## The Software Development Lifecycle

- ▶ Request from customer

- ▶ Design and architecture of product

- ▶ The development cycle starts

- ▶ We want

and NOT

## Lecture Outline

- ▶ The Software Development Lifecycle
- ▶ Scenario 1: Subversion
- ▶ Scenario 2: Bugzilla
- ▶ Scenario 3: LuntBuild
- ▶ How it All Fits Together

## The Software Development Lifecycle (Cont.)

- ▶ To ensure success software companies use **tools** when building products

- ▶ In **Programming I and II** you learn how to use the “hammer”

- ▶ In **Software Lab I and II** you learn how to become a professional constructor. That can build real houses that people can live in.

## The Software Development Lifecycle (Cont.)

### ► What are the tools we will learn how to use:

- Integrated Development Environment: **Eclipse** 
- Version Control System: **Subversion (SVN)** 
- Bug Tracking System: **Bugzilla** 
- Continuous Integration: **LuntBuild** 

### ► Why do we need to learn them?

► 5

## Scenario 1: Subversion

### ► Scenario 1:

- A team of 5 are writing the software.
  - 2 are located in Cyprus
  - 1 located in Greece
  - 2 located in USA
- How do they work on **the same files at the same time**?

How do we share the source files?

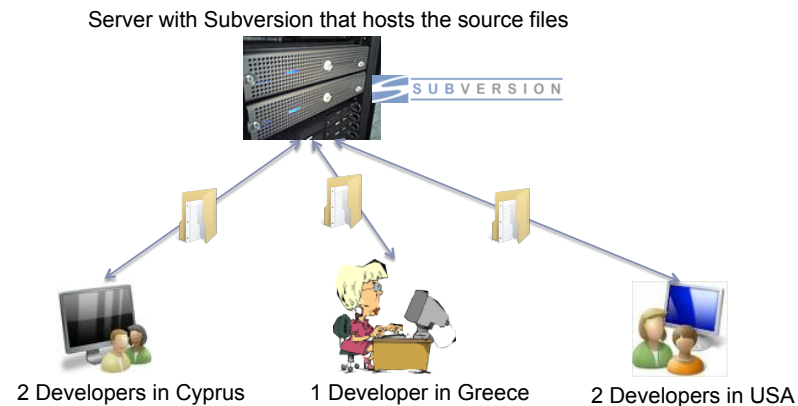

► 6

## Scenario 2: Bugzilla

### ► Scenario 2:

- **Product is given to 5 test users**
- How do the test users **report** their **experience** with the software?
- How does the **developer** inform the **test users** about **updates/fixes**?

How does the **test users** inform the **Bug Fixer**

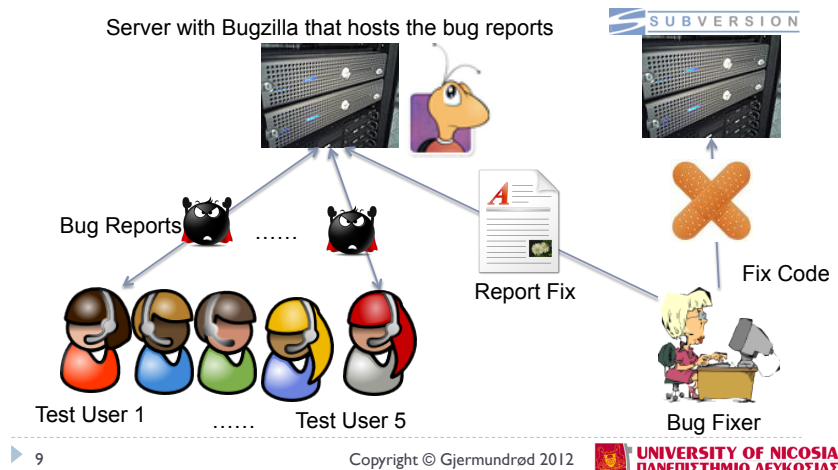

► 8

## Scenario 2: Bugzilla (Cont.)

- ▶ Bugzilla can be solution to scenario 2

## Scenario 3: LuntBuild

- ▶ Scenario 3:
  - ▶ A team of 5 are writing the software
  - ▶ Product is given to 5 test users
  - ▶ The developers are **continuously fixing** bugs and **updating** the **product**
  - ▶ How can the test users **obtain** the **latest "test release"** of the product?

## Scenario 3: LuntBuild (Cont.)

- ▶ LuntBuild can be solution to scenario 3

## How it All Fits Together
